

Module	Admin
Login	Chrome 138, Windows 11
Tested by	Artur Piradyan
Objective	To verify that the Admin module correctly supports administrative functions, including:
	User account creation and role assignment
	User search and edit functionality
	Enabling/disabling user accounts
	Assigning roles and permissions
Scope of testing	In Scope:
	Add user with valid data
	Prevent user creation with missing or duplicate info
	Search/filter users
	Edit user role and status (enabled/disabled)
	Out of Scope:
	SSO or LDAP login
	External integrations (email, identity provider)
	Audit logs or advanced security testing
Test Strategy	Approach: Manual functional testing through web UI
	Test Data: Dummy employee names, IDs, departments
	Tools: Browser, Excel for test cases, PDF for documentation

Entry Criteria	Admin login credentials are available
	Admin module is accessible
	At least one existing employee to assign user account to
Exit Criteria	All Admin test cases executed
	No critical bugs remain
	User creation, edit, and search functions confirmed
Deliverables	Test Plan (this document), Test Cases Document, Execution Report, Bug Report
